

COVID-19 Guidelines @ Atlantic Horizons 2022

About our site

Over the last 2 years we have taken extra measures for our site to ensure that we are providing safe and suitable surroundings for you to come and enjoy a much needed relaxing and stress free holiday. All of our glamping units and camping pitches were allocated their own eco wash room, meaning that you have your own compost toilet and eco shower to use during your stay if you wish. Guests will also have access to our main site wash room that has a further two toilets and one shower, as well as a large Belfast sink.

The site has now been equipped with hand sanitiser stations, one in the car park area, one at the entrance to the main wash room, another located inside the main wash room and separate sanitising units for each of the other wash facilities. With many measures eased, it is entirely your choice whether you use these.

As a business, we will still take precautions on site where necessary to protect our staff and guests.

We kindly ask that you strip your bedding and put into a pile with your towels once you come to the end of your stay.
